Forecast for Monday 06 Jun 2022

Weather: Overcast skies with low cloud blanketing many slopes at first, with outbreaks of light rain and drizzle easing and largely dying out by mid-morning. Scattered showers developing for the afternoon along with a few sunny spells. Showers dying away in the evening with some clear spells developing.

Chance of cloud-free hill tops above 600m: 10% or less at first improving to 80% or better late in the afternoon.

Low cloud and visibility: Extensive low cloud covering slopes above 300-400m through the morning. This lifting late afternoon by leaving small amounts of cloud around 500m. Visibility beneath cloud initially poor in rain and drizzle, but improving to become generally good by midday, with only brief deteriorations in any passing showers.

02:00 on Mon 06 Jun 2022	8.6mm	11.6mm	11.6mm

Forecast for Tuesday 07 Jun 2022

Weather: Misty at first on Tuesday morning with low cloud shrouding many summits. This cloud will lift and disperse by mid-morning leaving sunny spells. Scattered light showers will develop by midday, these continuing throughout the afternoon. Clouding over in the evening with outbreaks of heavy rain arriving before midnight.

Maximum wind: South to southwest 15-20mph gust 25mph.

Chance of cloud-free hill tops 600m: 80% deteriorating to 20% during the early hours and at first on Tuesday morning. Improving to 100% by mid-morning, but deteriorating to 20% mid-evening onwards.

Low cloud and visibility: Areas of low cloud will develop during the early hours, covering many slopes above 400m, but this cloud will lift clear of the summits around mid-morning. Cloud will remain clear of the summits throughout the afternoon, however extensive low cloud with base 400-500m will develop mid evening onwards. Visibility generally good beneath cloud, but moderate to poor in mist first thing, in any heavy rain late in the evening.

Temperature: **Valleys:** Plus 9 Celsius becoming Plus 17 Celsius.
At 600m: Plus 11 Celsius.
Freezing level: Above the summits.
